

## INSTALLATION INSTRUCTIONS

1

### OPEN your STARClingz or PETClingz

Carefully unwrap the bubble wrap protective liner from the cling. Do not use any sharp object such as scissors, knives, or screwdrivers. Inspect your cling and please alert Banners With Class at 1-888-330-3331 if you notice any damage. If your cling appears to be sliced through the backer, this is perfectly normal and will not affect hanging your cling.

2

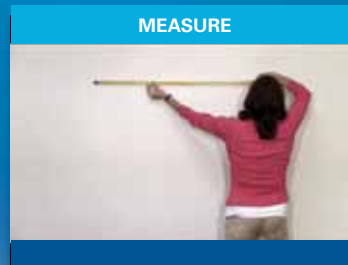

### UNROLL your STARClingz or PETClingz

Unroll and lay flat face up (picture side) for up to 24 hours.

3

### Find the BEST SPOT and CLEAN the wall

Clingz are made for interior use only. Measure your wall to be sure that it has enough room to hang your cling. Once you find the perfect spot, clean any surface dust or dirt by using a warm damp cloth. It is a good idea to clean an area larger than the size of the cling to allow repositioning. Do not use any chemical cleaners. Let the wall surface dry completely before hanging your cling.

MEASURE

CLEAN WALL SURFACE

- STARClingz are best applied to interior painted surface
- NO Brick, Stucco, Wallpaper or other textures
- Let newly painted walls dry at least 30 days before hanging

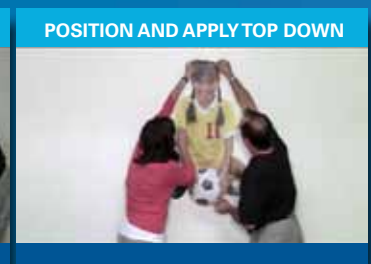

4

### It takes TWO People to Hang

Clean your hands first. Each person will need to position themselves on either side of the cling. Get started by each evenly peeling the top of the cling away from the backer. Slowly continue to peel until the entire cling is free from the backer. At this point, **BE VERY CAREFUL** to avoid letting the cling stick to itself. Working together, position and align your cling to the wall and begin applying from the TOP down. It is important to remove any bubbles. Working from the center, use your thumbs in order to push any bubbles to the nearest edge of the cling. Take care not to create wrinkles as you work bubbles out. Lift off and re-position if necessary. Once your cling is applied to the wall, gently apply pressure over the entire graphic surface with your thumbs to finish the application. Rub with a clean dry cloth to remove any oils left from your hands.

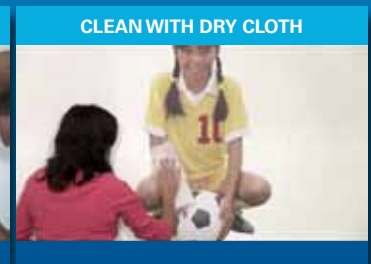

EVENLY PEEL FROM TOP

POSITION AND APPLY TOP DOWN

REPOSITION IF NECESSARY

CLEAN WITH DRY CLOTH
